

# Build the international resistance

Let us take a new step in the fight back against global capitalism. It's time for a new global anti-capitalist youth movement!

We urge every fighting youth organization to take part in a discussion to build a new global anti-capitalist and socialist movement. We aim to build a movement which can step up the worldwide struggle to defend the rights of young people, fight the capitalist exploitation of working people and the poor, struggles against pollution and a looming environmental disaster. An organisation that is prepared to take a firm stand against racism and sexism and fights to replace the dictatorship of the market with production for need not profit - a new democratic socialist world.

While the forces of global capitalism and its institutions are turning the screw on young people, workers and poor, the international resistance is also on the march. Millions of youth have already seen through the great lies spread by the apologists of global capitalism and the politicians who act on behalf of big business. The international mass demonstrations organized in Seattle, Melbourne, Prague, Nice, Quebec and Gothenburg have already shaken the ruling elite of the world.

The initiative to form a new youth global anti-capitalist movement with a democratic socialist aim has come out of these demonstrations and protests. That is why Elevkampanjen, together with other organizations, after Gothenburg 14-16 June decided to call a meeting in Brussels the day after the demonstration against the EU summit to launch such an organisation. That will be 15 December 2001.

We appeal to you and any youth organisation that is interested to come to Brussels in December and/or sponsor our initiative. Contact Elevkampanjen.

Yours in Struggle
