

Public Bike Pump

This heavy duty public bicycle pump is a modern piece of street furniture that can be installed anywhere in the city to provide cyclists with a convenient facility to pump up deflated tyres.

The pump features a robust stainless steel pump handle and an armoured air hose, designed to withstand constant public use.

This product is ideal for installing at bicycle parks, along cycle routes and can be neatly incorporated into a row of bollards or used as a stand-alone pump in high profile city centre locations.

Specification:

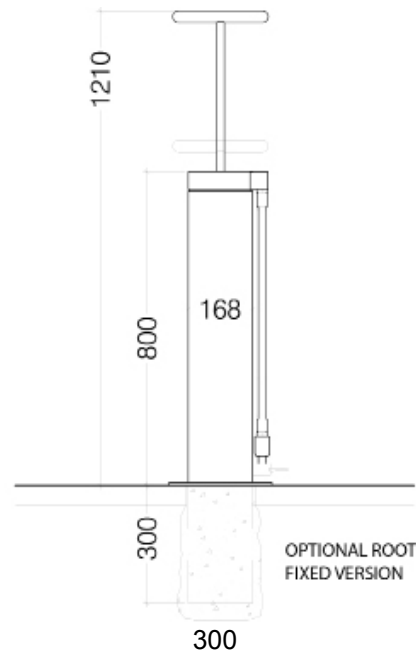

- Weight: 25Kg
- Material: Stainless steel
- Surface mounted or submerged fixing
- Maximum pressure: 220 PSI / 15 bar
